

HP Single Monitor Arm

Full motion comfort is within reach

A fully adjustable, space-saving monitor solution right at your fingertips.

Arm shown with HP LA2205wg commercial monitor.
Monitor sold separately.

Sleek and streamlined, the HP Single Monitor Arm is the perfect accessory to add comfort adjustability, productivity, and flexibility to your business.

Increase viewing comfort with just a touch

The flexible design of the HP Single Monitor Arm provides a seemingly endless range of display adjustments with an amazing 13 inches of lift, 85 degrees of tilt, and 360 degrees of pan and rotation – all at your fingertips – helping you stay comfortable and productive throughout the day.

Do you wear multifocal lenses to keep screen content in focus? With the arm mount you can easily position the monitor low and close to the desk with just a touch of your hand for more comfortable views of your work. Low placement is also perfect for students in educational settings as the monitor head better reaches lower eye levels and helps avoid uncomfortable neck positions.

As well, if you are taller in stature, the arm can be raised up to 13 inches to help reach your higher eye level – that is more than 2X the height adjustment of many monitor stands!

Finally, if you need to share your screen with others just extend the arm and let them take control of their own viewing experience. They can customize the arm to any position – whether they prefer a screen that is near or far, high or low, tilted or rotated.

Get productive with space-saving convenience

The HP Single Monitor Arm set-up is easy quick and simple. Convenient cable management routes cables under the arm and out of the way, while the compact design frees up valuable desk space when it is folded and tucked away.

Gain flexibility with smart functionality

The HP Single Arm Mount's specifications and benefits include:

- Swing arm supports an LCD head up to 24 diagonal inches (60.96 cm) with weights from 7 to 20 lbs (3.1 to 9.1 kg) for a wide monitor selection*
- Short pole allows complete folding for tucking under furniture in space constrained areas
- Clamp and grommet mount base ensures greater stability of display and arm
- Base includes theft deterrent anchor holes for cable locks
- Independent arm has extension mounting capability*

HP Single Monitor Arm
