Lifehack: standing burns calories

If you stand for three additional hours each day over the course of a year, you can burn up to 30,000 extra calories and eight pounds of fat. That's the equivalent of running about ten marathons.¹

$$\text{Person} + \text{Clock} + \text{Clock} + \text{Clock} \times \text{Calendar (365)} = \text{30,000 CALORIES} \ \& \ \text{8 POUNDS OF FAT}$$

¹ Calorie burner: How much better is standing up than sitting? BBC News 2013
